Description

The Seaward PV150 Solar Installation Tester allows electrical safety and performance verification of photovoltaic installations in a safe and easy-to-use device.

Why buy the PV150 multifunction solar PV test kit?

- Seaward Solar Installation PV150 instrument.
- 2 x MC4 test lead adaptors.
- 2 x Combiner box test probes and detachable alligator clips (MC4).
- 2 x Test leads, with test probes and detachable alligator clips (4mm).
- AC/DC current clamp.
- Solar Survey 200R irradiance meter and temperature probe.
- Solar Survey 200R mounting bracket.
- Rugged carry bag.
- Quick Start Guide.
- UKAS Calibration Certificate (PV150).
- SolarCert PC Software.

Part Number: 388A915

- Save time using a number of different measuring tools in the field with this fast and comprehensive solar PV tester.
- The PV150 features a safe test connection meaning you can safely test energised arrays.
- The unit can also wirelessly capture and record real time irradiance, ambient temperature and PV module temperature measurements from the Solar Survey 200R.
- 200 datasets can be stored on the PV150 and downloaded to the SolarCert software so you can create professional reports for your customers.
