Description

ABT100 Battery Tester is very effective and economical battery management device for testing battery internal resistance (or conductance) and voltage. It helps you eliminate weak batteries to ensure performance of your battery systems.

It is capable for accurate measurement of Valve Regulated Lead Acid (VRLA), Vented Lead Acid (VLA) batteries and Ni-cd batteries which are the main composition of standby critical power systems. This battery tester is widely applied for service providers, operations and maintenance teams for battery management and measurement to ensure power integrity in telecom networks, data center, power utility, fork lift maintenance and so on.

Filed of Applications:

- Telecom & communication power
- Uninterrupted Power Supplies (UPS)
- Utility transmission and distribution systems
- Data, healthcare, education or financial
- Forklift battery maintenance
- Refinery, mining and offshore platform

Altern Data View software provide smart solutions for data analysis, battery condition tracking and report printing.
